CAREER OBJECTIVE

Business Intelligence, Cloud Analytics, and Data Analytics professional with 9+ years of experience delivering end-to-end data solutions on Power BI, Azure, and Microsoft Fabric.

Passionate about driving business value through scalable, automated, and AI-driven analytics platforms.

PROFESSIONAL SUMMARY

9+ years as Data Analyst/Engineer across finance, engineering, and consumer domains

Deep expertise in Power BI, Azure (ADF, Databricks), SQL, Python (incl. NLP), and Microsoft Fabric

Proven track record of delivering 40+ dashboards and analytical models for 150+ global users

Strong stakeholder engagement, Agile leadership, and cross-functional collaboration

CORE SKILLS & TECHNOLOGY STACK

BI & Visualization: Power BI (DAX, Power Query), Tableau, Fabric, Dataflows

Azure Cloud: Azure Data Factory (ADF), Databricks, Fabric Pipelines

Data Modeling: SQL, MySQL, Dimensional Modeling, Star Schema, ALM Toolkit

AI/NLP: Text Analytics, Python (NumPy, Pandas, NLTK, Matplotlib)

DevOps & Automation: Tabular Editor, DAX Studio, Power BI Gateway, Version Control

Soft Skills: Stakeholder Management, Training, Requirements Gathering, Agile/Scrum

Senior Data Analyst / Fabric Engineer | Specialist – Data Engineering — LTMindtree, Hyderabad

Dec 2023 – Present

Led Power BI and Microsoft Fabric projects for Fortune 500 clients across Product, Finance, and Executive teams

Owned sprint planning, scrum ceremonies, technical documentation, and mentoring in Agile environments

Architected end-to-end solutions handling 110GB semantic models with strong performance optimization

Automated processes using Tabular Editor and C# scripts, reducing manual effort significantly

Built and managed Azure Data Factory pipelines for large-scale semantic models

Implemented NLP-based sentiment and text analytics in live dashboards

Stabilized refresh processes using Incremental Refresh and optimized gateways

Designed star schema models, optimized DAX calculation groups, and improved report performance

Implemented row-level security, governed workspaces, and built training playbooks for global users

Mentored junior analysts and delivered training on Power BI, Azure, and NLP techniques

Power BI Developer / Data Analyst / Data Engineer | Engineering Lead — Infosys, Hyderabad

July 2016 – Dec 2023

Designed and delivered 40+ dashboards and analytical models across multiple business units

Engineered Incremental Refresh for large semantic models up to 40GB, improving refresh stability

Automated manual reporting and reduced stakeholder effort by approximately 60%

Migrated Tableau prototypes into production Power BI environments

Authored knowledge bases and trained 20+ analysts

Implemented data quality checks including null and outlier validation and reconciliation

Used Tabular Editor, DAX Studio, and ALM Toolkit for version control and performance tuning

Built ETL and dataflows using SQL and MySQL with Azure integrations

Partnered with stakeholders to translate business requirements into effective dashboards

Conducted end-user workshops to drive Power BI adoption and reduce support queries

CERTIFICATIONS

PL-300 – Microsoft Power BI Data Analyst

Microsoft Python Certification

AWARDS & RECOGNITION

Infosys Insta Award (2x) for analytics innovation and mentoring

Client recognition for precision dashboard delivery and business support
